SL TF-201 Chío Arguayo

HOW TO GET THERE

The path starts at km 28 of the RF-38 Chío-Boca Tauce road. Buses operate to the district of Chío from Guía de Isora:

Line 477 Journey From Costa Adeje, Los Gigantes

Marks on the path

Marcas registradas por la FEDME

PR-TF 69 Chío-Vera de Erques
Along this path we can observe numerous plots devoted to traditional agriculture, such as vineyards and some isolated houses. A visit to the rural settlement of Chirche is a must as it has been declared a Site of Cultural Interest, as well as the hamlet of Las Fuentes.

PR-TF 70.3 Boca Tauce - Refugio de Chasogo
The landscape along this path is mainly volcanic badlands and interesting volcanic morphologies. You will observe former threshing floors (eras) built on pahoehoe lava, known as the Era de la Fajana de Charagueche and the Era de los Guanches.

PR-TF 69.1 Chiguergue-Chasogo
Most notable along this route is the impressive area of ropy lava, pahoehoe flows and lava tubes. This path leads to the recreational area of Los Arenales (recreational area in Chío).

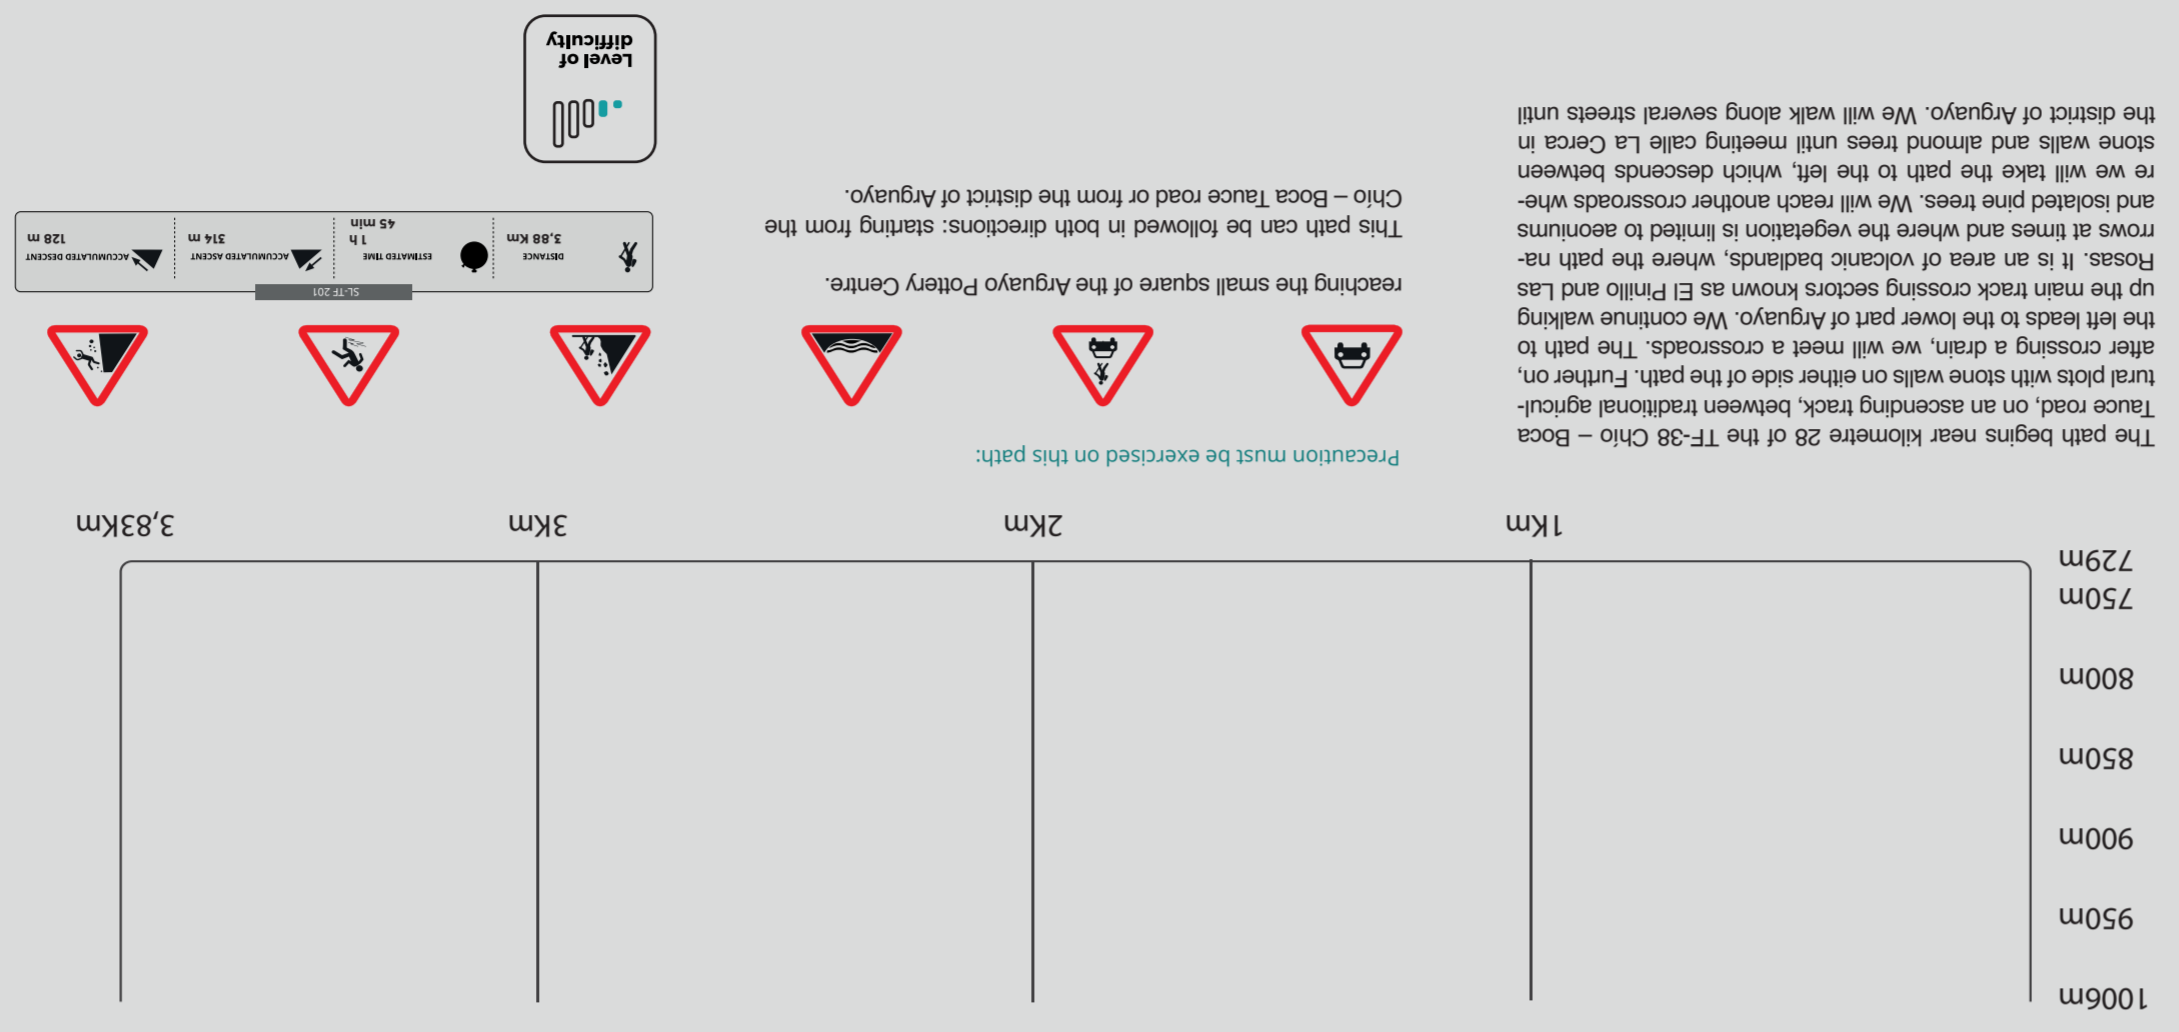

SL 203 Chío-Arenales
The route begins by crossing a pine forest growing on recent basaltic lava flows and passes through a very homogeneous area with small lapilli fields and volcanic badlands. There is a recreational area here and a zone for camping.

PR TF 70.1 Boca Tauce - El Jaral
This route offers spectacular panoramic views of the town, and especially of the Barranco de Tágara ravine. There are different ethnographic elements along the path.

SL 206 El Jaral-Guía de Isora
The Barranco de Rodrigo ravine and the Cruces de Ramallo are some of the places of interest that you will find along this path covered in rock roses, shrubs with striking white flowers traditionally used to smoke cheeses.

Guía de Isora Path Network

OUR PATH NETWORK

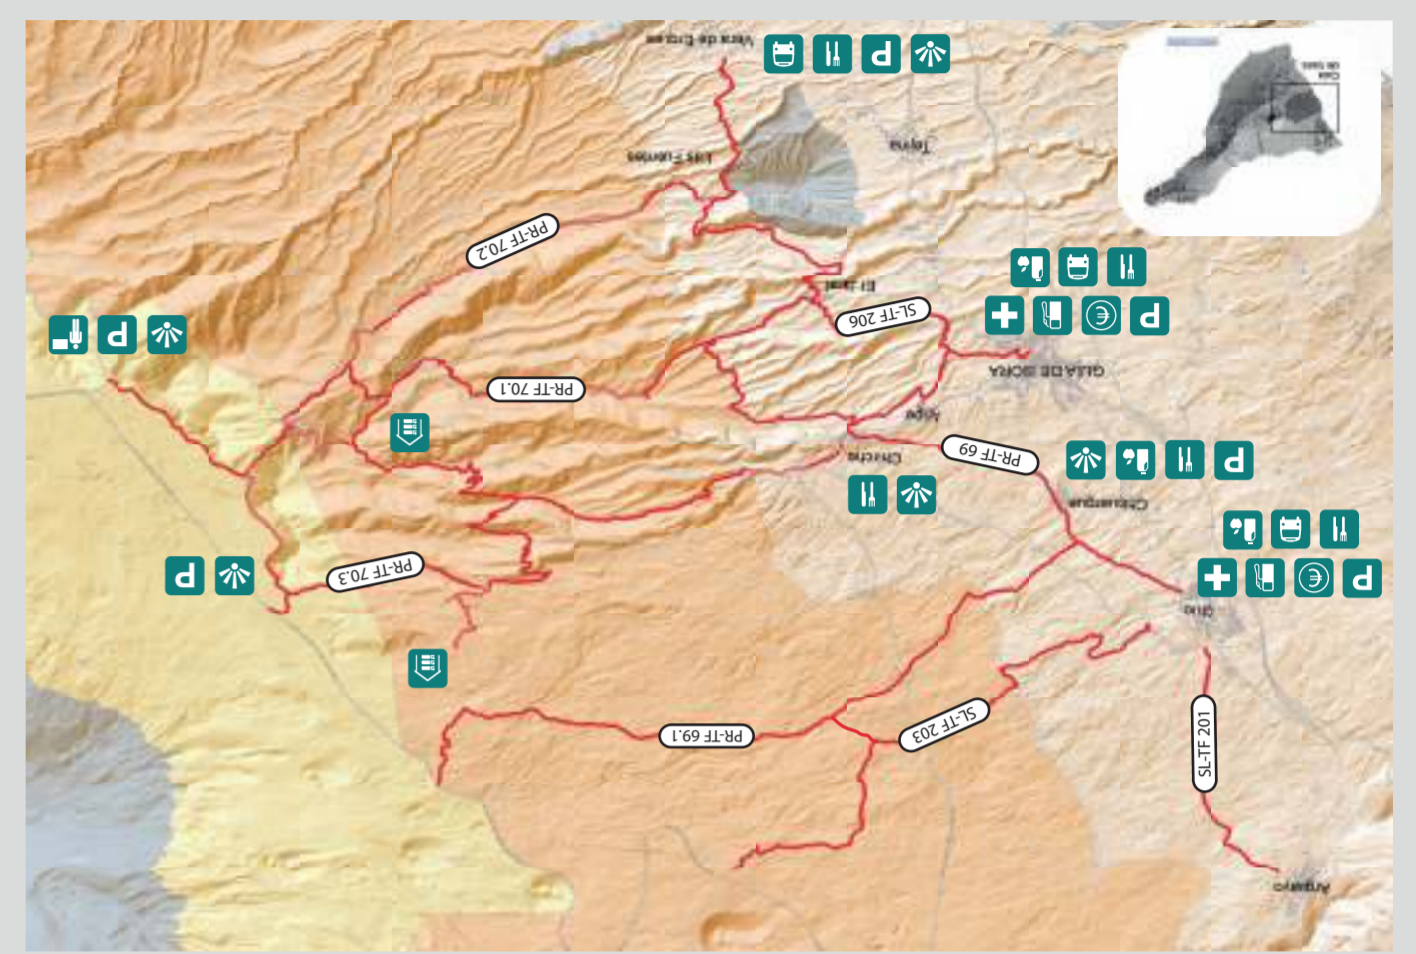

PR-TF 70.2 Boca Tauce - Las Fuentes
This route provides impressive panoramic views of the mountains of Isora, and even out as far as the islands of La Gomera, La Palma and El Hierro. We will find endemic species such as tagasaste and sticky broom (codesos), and we will visit the hamlet of Las Fuentes.

- Look after your safety**
 - Wear suitable walking boots or shoes for the difficulty of the route.
 - Do not forget to carry a raincoat and a hat to protect yourself from the sun.
 - Make sure you have enough water and food for the duration of the walk.
 - Remember that there is not always mobile phone coverage in natural areas, but it is advisable to carry a mobile phone. Check that it is fully charged before leaving.
 - Risks increase if it rains or there are strong winds. Stay informed of the weather forecast.

- Preserve the environment**
 - Keep the path clean and take your rubbish with you.
 - Take great caution with cigarette butts. They can cause fires.
 - Bear in mind that we are in fragile natural areas. Do not pick or take plants or any other elements.
 - Avoid creating noise. Respect the environment.
 - To preserve the landscape, do not leave the marked paths.

- Plan your route**
 - Avail of the help of guides, maps and people with adequate walking experience (for example, from walking clubs and associations, tourist information offices and accommodation providers).
 - Obtain information about distances, difficulty level and the estimated time needed to complete the route, as well as any possible risks that could occur.
 - Gauge your physical ability to complete the route according to its technical characteristics: accumulated ascent and descent, duration...
 - Consult the weather forecast.
 - Tell your friends or relatives about the route you plan on doing and where it is.
 - If you are walking with children or larger groups remember that you will need a lot more time.

Chío

Chío

The volcanic conditions, such as those surrounding Guía de Isora, led to a series of interventions and to the creation of rural settlements of great interest. The patrimonial legacy that can be observed in these hamlets is a true open-air ethnographic museum.

Traditional agriculture

Some of the paths in the town allow us to easily discover these enclaves, since many elements of the way of life and of traditional architecture have been very well preserved. Volcanic environments such as those surrounding Guía de Isora gave rise to a series of interventions that led to the creation of very interesting rural settlements. The patrimonial heritage that can be appreciated in these hamlets truly is an open-air ethnographic museum.

Canaries pine tree

This endemic species is the most prevailing tree on the archipelago. The pine trees, including those from reforestation, occupy some 70,000 hectares, almost 60% of the forest surface area of the Canary Islands. Contrary to other species it has slim, acicular leaves, arranged in groups of three. It can withstand moderate fires thanks to its thick layer of cork and its ability to flower from the trunk.

Aeonium

A short-stemmed herbaceous plant with large, round, flat leaves like rosettes. It is native to the archipelago and present on all the islands, both in low- and mid-altitude regions. The distinguishing feature of this plant is its leaves, large rosettes that measure between 15-30 cm whose tips sometimes overlap with each other.
