**PR-TF 69 Chío-Vera de Erques**  
Along this path we can observe numerous plots devoted to traditional agriculture, such as vineyards and some isolated houses. A visit to the rural settlement of Chiriche is a must as it has been declared a Site of Cultural Interest, as well as the hamlet of Las Fuentes.

**PR-TF 70.3 Boca Tauce - Refugio de Chasogo**  
The landscape along this path is mainly volcanic badlands and interesting volcanic morphologies. You will observe former threshing floors (eras) built on pahoehoe lava, known as the Era de la Fajana de Charagueche and the Era de los Guanches.

**PR-TF 69.1 Chiguergue-Chasogo**  
Most notable along this route is the impressive area of ropy lava, pahoehoe flows and lava tubes. This path leads to the recreational area of Los Arenales (recreational area in Chío).

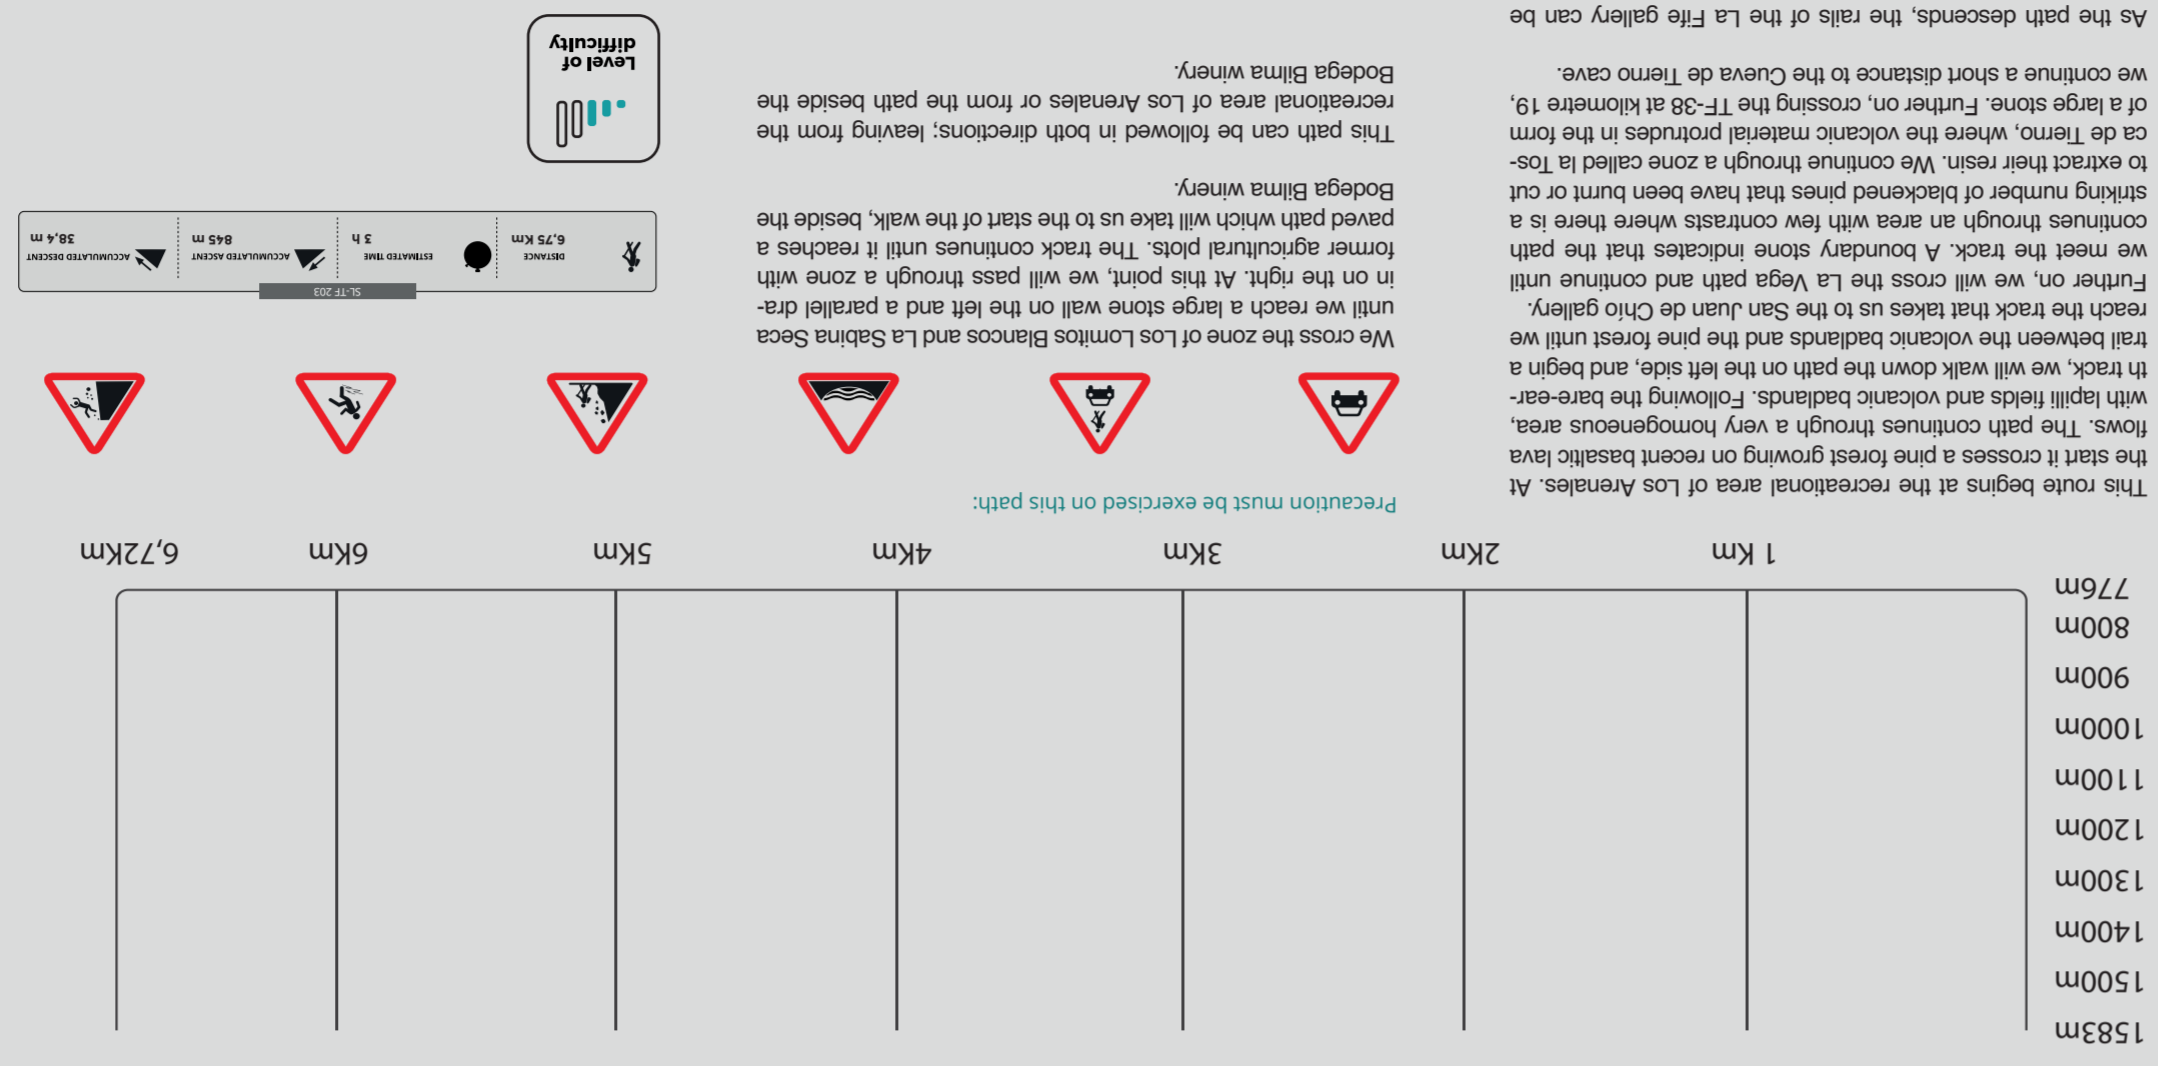

**SL 201 Chío-Arguayo**  
Along this path we will see traditional agricultural plots with low dry stone walls, and we will enjoy panoramic views of the western side of the town. In this area of volcanic badlands, the main vegetation consists of aeoniums and isolated pine trees.

**PR TF 70.1 Boca Tauce - El Jaral**  
This route offers spectacular panoramic views of the town, and especially of the Barranco de Tágara ravine. There are different ethnographic elements along the path.

**SL 206 El Jaral-Guía de Isora**  
The Barranco de Rodrigo ravine and the Cruces de Ramallo are some of the places of interest that you will find along this path covered in rock roses, shrubs with striking white flowers traditionally used to smoke cheeses.

- Look after your safety**  
Wear suitable walking boots or shoes for the difficulty of the route.  
Do not forget to carry a raincoat and a hat to protect yourself from the sun.  
Make sure you have enough water and food for the duration of the walk.  
Remember that there is not always mobile phone coverage in natural areas, but it is advisable to carry a mobile phone. Check that it is fully charged before leaving.  
Risks increase if it rains or there are strong winds. Stay informed of the weather forecast.

- Preserve the environment**  
Keep the path clean and take your rubbish with you.  
Take great caution with cigarette butts. They can cause fires.  
Bear in mind that we are in fragile natural areas. Do not pick or take plants or any other elements.  
Avoid creating noise. Respect the environment.  
To preserve the landscape, do not leave the marked paths.

- Plan your route**  
Avail of the help of guides, maps and people with adequate walking experience (for example, from walking clubs and associations, tourist information offices and accommodation providers).  
Obtain information about distances, difficulty level and the estimated time needed to complete the route, as well as any possible risks that could occur.  
Gauge your physical ability to complete the route according to its technical characteristics: accumulated ascent and descent, duration...  
Consult the weather forecast.  
Tell your friends or relatives about the route you plan on doing and where it is.  
If you are walking with children or larger groups remember that you will need a lot more time.

### Canaries pine tree

This endemic species is the most prevailing tree on the archipelago. The pine trees, including those from reforestation, occupy some 70,000 hectares, almost 60% of the forest surface area of the Canary Islands. Contrary to other species, it has slim, acicular leaves, arranged in groups of three. It can withstand moderate fires thanks to its thick layer of cork and its ability to flower from the trunk.

### Pine needles

The dry leaves that fall from the pine tree and cover the floors of pine forests are known as pine needles. Traditionally pine needles have been used as bedding for animals, as packaging to protect bananas, tomatoes and other vegetables being transported, and as a fertilizer in agricultural farms.

### Lapilli

Lapilli are a material ejected by a volcano during an eruption. Its diameter varies from 2 to 64 mm. In the Canary Islands it is known as picón. Lapilli are formed in explosive eruptions through the fragmentation of the lava covering the gas bubbles that rise to the surface and explode due to the difference between their internal and external pressure.

### Pino de La Leche

It is said that goatherds of the area used to rest in the shade of this huge pine tree and gather their animals.

### Galería de San Juan de Chío

Gallery built at the end of the 1940s.

## Chiguergue
